

# AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Replace the first full paragraph on page 4 with the following amended paragraph:

Referring to Figures 2 and 3, the accessory device 20 in the form of a tray has an upper surface 22 which includes an inner edge 24 and an outer edge 26. The accessory device 20 is formed as a one piece integral unit molded of a plastic material. Flanges 30 At least one flange portion such as flanges 30 shown in figure 3 extend inwardly from and along a portion of the upper surface 22, and said Said flanges 30 are formed of a particular shape and are shown as being generally rectangular in shape. Flanges 30 are received by a recess 17 of a particular shape (rectangular shape shown) which forms a notch in the perimeter 16 of the top surface 12 of spa 10 (see Fig. 6). When so received, said upper surface 22 of the accessory device is coplanar with the top surface 12 of the spa. Openings 32 which are also generally rectangular in shape are provided in a center portion of the flange 30. The accessory device 20 includes downwardly depending support portions 34 which each have an inner wall 36 and an outer wall 38. Figures 2 and 3 show an accessory device in the form of a tray. The accessory device 10 has an inner edge 24 of the upper surface 22 which is curved along an arcuate path and is adapted to mate with and conform with the curvature of the outer edge and exterior perimeter 16 of the top surface 12 of the spa 10.
